15W, hordozható, akkumulátoros működés, USB2.0, Bluetooth, távirányító, 1,24kg

Cikkszám: MT3145

Ár:

**13 780 Ft**

### Product description

Media-Tech presents a magic and compact Bluetooth soundbox. BOOMBOX BT MT3145 has a built-in subwoofer and two midrange speakers. The total output power is 15W RMS.

The active Bluetooth interface lets you listen to music files, which you can transmit wirelessly from any Bluetooth device (eg. Telephone, smartphone, tablet). No cable spaghetti anymore.

Due to the USB port and microSD slot with reader function you can play your music files directly from external flash drives.

Thanks to the durable built-in battery, the BT BOOMBOX is a portable speaker system perfectly suited for home and/or office use. All kinds will love this device too, for example on holiday trips. If fully charged, this device works up to 6 hours!

Additionally it has 3.5mm AUX connector integrated. It allows you to connect almost all audio sources.

It was very important for us, to create a speaker system in a wooden box. This feature boosts up the sound quality in a positive way.

On the right and left side MT3145 has two midrange drivers. The front panel has a LED information display, control buttons and a 3-inch subwoofer. Moreover it has built-in: USB port, AUX input, a slot for memory cards (microSD) and a miniUSB interface for charging.

At the top of the device is a telescopic antenna for FM radio receipt and handle. Under the speaker, there are four non-slip feets.

This Boombox comes out to the stores with a wireless remote control, USB cable for charging and a AUX cable.

### Technical specification
