Thermaltake H200 TG RGB ATX Mid Tower Chassis

The H200 TG RGB is designed for PC builders who want a clean and sleek look but crave for good cooling performance and tempered glass at the same time. The H200 TG RGB is a standard mid-tower chassis with motherboard support up to ATX. It comes with one preinstalled standard 120mm fan, and an RGB button that can switch between 19 lighting modes. Brining you an exteriorly simple look and internally sophisticated design.

Classic Design with RGB Light Bar Front Panel

With an unique RGB light bar, the front panel of H200 TG RGB presents a smooth and elegant style.

Built-in PSU Cover

Comes with a full-length PSU cover with a ventilated design to enhance the airflow and hide those unsightly cables.

Tempered Glass Window

The tempered-glass hinge door is designed with a smart lock security system which secures the inner components of your case. H200 TG RGB is built to be more durable, scratch resistant and, of course, easy-to-use.

Superior Hardware Support

The H200 TG RGB has outstanding expandability with support for a tower CPU cooler with maximum height 180mm, a dual VGA expansion slot of up to 320mm in length, and a power supply with length of up to 160mm (with 3.5" HDD Drive installed) and up to 220mm otherwise.

Excellent Cooling Capability

Optimized for excellent cooling capability with one 120mm fan preinstalled. The case is able to house up to dual 140mm or three 120mm front fans, up to 2x 140mm fans on top, and a radiator size up to 240mm on top to allow users to build a desired high-end system.

Handy I/O Ports

Two 3.0 USB ports on top of the front panel grants direct access when needed. A specially designed RGB control button provides users 19 different light effect selections.
