24/7 Parking Surveillance

Directly to the battery for constant 24hrs/7days power to protect against theft when your car is in the parking lot.

Low voltage protection

It has a smart low voltage protection system that will automatically shut off the power to your dash cam when the battery voltage drops below your set value (11.6V/12V/12.4V, 23.6V/24V/24.4V option available), thus preventing it draining the battery.

Low voltage protection

LED Digital Display Screen

This type c usb OBD hardwire power cable is equipped with an LED digital display screen, which displays the real-time voltage of the battery and the set voltage, monitors whether the battery is operating normally, and protects the equipment.
