Vantrúe 3-Lead ACC Hardwire Kit for N5, N4 Pro, N4, E1, E2, E3, S2, N2S, X4S, 5 Low Voltage Protection Options with Shifting Gear for Parking Mode

Low voltage protection

It has a smart low voltage protection system that will automatically shut off the power to your dash cam when the battery voltage drops below your set value(11.6V/11.9V/12.2V/12.5V/23.6V/23.9V/24.2V/24.5V option available), thus preventing it draining the battery.

Timer setting

Custom timer setting (1, 3, 6, 12, 24 hours or always recording) available for continue recording/receiving power after you parked your car.

ACC linkage function

Auto shift to parking mode once ignition off thanks to the ACC linkage function, hassle free switch and operate with ACC connection.

Compatible 12 - 24V Vehicles

This hardwire kit connects the camera directly to the car, truck, bus, suvs, or big rig for continuous power, accepts voltage from any type of vehicles runs on 12 - 24V.

Multiple uses

Type C USB plug compatible with all Type C dash cams, GPS navigator and radar detector etc, it always frees up the cigarette lighter for other devices. Please note: It doesn't work for other Vantrúe Dash Cams, it only work for N4 N5 N4 Pro and E1, E2, S2-2CH, S2-3CH, N2S, X4S, T3 dash cam.
