### Divider 300 TG Air ATX Mid-Tower Chassis

Thermaltake designed a brand-new case series that contains a mixture of open-frame-styled elements and customizable options blending all the functionalities into the Divider Series. The most exceptional feature of the Divider 300 TG Air Mid Tower Case is the two symmetrical triangular pieces comprised of a steel panel and tempered glass window on the left side. On top of that, the air edition comes with one airflow-optimized mesh panel at the front for massive airflow. These panels are tool-free and easy to remove, showcasing the components inside. Additionally, the Divider 300 TG Air comes with two 120mm standard fans at the front and rear for maximum cooling performance. The Divider 300 TG Air ATX Mid Tower Case is the next -gen gaming PC case for regular users, enthusiasts, and gamers, giving them unprecedented satisfaction.

#### TT Premium

To continue achieving the corporate mission of delivering the perfect user experience, Thermaltake developed "TT Premium" with the essence of combining supreme quality products with a new logo design. TT Premium is far more than just a guarantee of quality. Behind the name, it represents the passion in DIY, Modding and Thermaltake's desire to be the most innovative brand in the PC hardware market. To satisfy the demand of the high-end PC users, TT Premium follows its core values of Excellent Quality, Unique Design, Diverse Combinations and Boundless Creativity to provide a high performance PC product for every enthusiast.

#### Tt LCS Certified

Tt LCS Certified is a Thermaltake exclusive certification applied to only products that pass the design and hardcore enthusiasts standards that a true LCS chassis should be held to. The Tt LCS certification was created so that we at Thermaltake can designate to all power users which chassis have been tested to be best compatible with extreme liquid cooling configurations to ensure you get the best performance from the best features and fitment.

## Avant-Grade Style Side Panels with Tempered Glass Windows

The exceptional feature of the Divider 300 TG Air is the two symmetrical triangular pieces comprised of a steel panel and 3mm tempered glass window on the left side. They are tool-free and can be removed separately, giving users a little open frame flavor and additional customization option when building in the PC case.

## Airflow-Optimized Panels

The Divider 300 TG Air comes with one large airflow-optimized mesh panel at the front for massive cooling performance.

## PSU Cover & Riser GPU Support Bracket

The built-in PSU cover is designed to hide unsightly cables with overall good ventilation. The Riser cable bracket not only enables vertical GPU installation, but also helps reduce the weight on the PCIe slots.

## Display It Your Way

Patented rotational PCIe slots give you the option to display your graphics card either horizontally or vertically, creating plenty of flexible space for your system.

## Excellent Dust Filtration

The Divider 300 TG Air has well-designed removal magnetic fan filters on the top and inner right side. At the front and base, the removable filters provide excellent dust protection and dirt reduction, ensuring a dust-free environment.

## Air Intake and Exhaust

The cooling performance of the Divider 300 TG Air is excellent. The front mesh panel and the vent between the two triangular pieces of tempered glass and steel panels on the left side allow optimal air intake. Cooling exhausts are located at the rear of the case. On the top and right side, there are venting mechanisms for air intake or exhaust depends on the user's overall PC layout design.

## Idle and Full-load Temperature

To let our customers better understand the thermal performance of the Divider 300 TG Air Mid Tower Case, we placed an AIO Liquid Cooler at the front and ran a test system. It shows that the temperature around the front area is really low at idle and at full-load, with no obstructions and restricted airflow. For the test we used AIDA64 Extreme Portable and FurMark ASUS ROG Edition both running simultaneously for 30 minutes, and the thermal images were taken with Testo 885-2 Thermal Imaging Camera.

## Excellent Hardware Support & Cooling Solution

The Divider 300 TG Air has great hardware support. It can support a CPU cooler with a maximum height of 145mm, VGA with maximum length of 390mm (without radiator), a power supply with a length of up to 220mm (without HDD Cage), two 3.5" HDDs with five 2.5" SSDs or a total of seven 2.5" SSDs. When it comes to cooling, the Divider 300 TG Air comes preinstalled with two 120mm standard fans at the front and rear for a complete cooling environment. Moreover, it can hold up to one 140mm fan at the top and two 120mm fans on the right of the motherboard side. Moreover, the Divider 300 TG Air is optimized for air cooling and advanced AIO liquid cooling components. It can support a 360mm AIO at the front, 240mm on the motherboard side, and 120mm at the rear.

## Handy I/O Ports

Two USB 3.0 and one USB 3.2 (Gen 2) Type C ports are placed on the top panel to grant direct access when needed.

## DMD: Dismantlable Modular Design

Strip your case down to the bones and install elements when and as you need them with our modular design. The Divider 300 TG Air features modular panels, racks, brackets, and pre-designed mounting arrays. No more unreachable screw corners or gaps, installation can be a breeze with our Dismantlable Modular Design.
